Hi-Spy Viewing Machines are manufactured
by Pinnacle Scopes. "Anything else is a compromise"
www.hispyviewing.com

Hi-Spy is committed to building and supplying high-quality viewing machines that last a very long time with a minimum of repair and maintenance. We are constantly innovating and looking for new ways to both improve our product and your profitability.

Simple, elegant appearance blends into any environment, both modern and historic, and invites higher usage.

- Flexibility in setting viewing time and price per view.
- Wide variety of foreign coins accepted (please inquire)
- Durable high quality materials and construction
- Little/no maintenance responsibilities.
- Fully waterproof optics

- Fully reciprocating focus
- Large quick-removal coin container on coin machines
- No need for any exterior power supply
- Engineered to offer high resistance to vandalism
- Successful track record serving some of the most popular tourist sites in North America

Locations Using Hi-Spy Viewfinders

Hi-Spy coin and non-coin operated binoculars and telescopes are "enhancing the view" at

- | | | |
|--------------|---------------------|----------------------|
| • Boardwalks | • Private Homes | • Bed and Breakfasts |
| • Towers | • Observation Decks | • Nature Preserves |
| • Parks | • Science Centers | • Scenic Lookouts |
| • Beaches | • Museums | • Zoos |

At Hi-Spy our technological developments are guided by four principles:

Durability

Every design must be robust and durable and engineered to be long-lasting outdoors in all environments.

Vandal-Resistance

Every design must take potential vandalism into consideration and every effort must be made to make it difficult for vandals to access or thwart the mechanisms.

Attractiveness

The overall design must be aesthetically pleasing. No change can be made that does not consider the overall "look".

A Commitment to Innovation

We don't rest on our laurels. We have a proven record of innovation. Since we operate hundreds of our machines for our own account, what we learn in the field goes into improvements:

We offer a wide range of models
